THE NEW

TOASTMASTER

AUTOMATIC *Electric*
WATER HEATERS

NOW... WITH IONODOGLAS!

Now, for the first time, the manufacturers of world-famous Toastmaster Automatic Water Heaters present water heaters with the Ionodic Glass Tank Protection System. The new models, equipped with *Ionodoglas* tank lining, *plus* the Ionodic system pioneered and developed for Toastmaster Water Heaters more than a decade ago, offer still greater permanence and dependability.

EFFICIENCY, FEATURES RETAINED

The same features which have given Toastmaster Water Heaters a reputation for superior efficiency and outstanding service still apply to today's models. The well-known Life-Belt Element with its "gentle" heat principle, the heavy-duty steel tank, heat- and money-saving Fiberglas insulation, reliable controls still contribute to the fine Toastmaster performance. In addition, non-glass-lined models in capacities of 30, 40, 50, 67, 82, 100, and 120 gallons will continue to be available. See specifications on reverse side.

A TOASTMASTER PERFORMANCE MASTERPIECE

- ✓ Ionodic* Glass Tank Protection System . . . including *Ionodoglas** tank lining. Perfect, longer-lasting protection against tank corrosion and rust! (in 40, 50, and 82-gallon models only.)
- ✓ Heavy-duty Toastmaster* steel tank . . . built for long service, even *without* Ionodoglas protection! Chemically coated against external corrosion, too!
- ✓ Life-Belt* Element . . . the famous element that applies heat to water quickly, "gently," and won't cause lime or scale to form inside the tank, no matter how hard the water!
- ✓ Heat-saving Life-Belt Element channel . . . designed to help keep heat *inside* the tank!
- ✓ Thoroughly dependable thermostatic temperature controls . . . precision-built, constantly watchful protection.
- ✓ Fully insulated with moisture-proof, sag-proof, fire-proof *Fiberglas* . . . keeps water hot for days!
